RUM Community Group

2026-10-14 Edition

Agenda

- Interop 2027

Logistics

- Meeting cadence
  - 2nd Wednesday of the Month
  - 60 minutes
  - 10am ET
- Agenda Document
  - (bit.ly/rumcg-agenda)
- Google Meet for Meetings
  - sub to rumcg-participants for invites
- Chat on Web Performance Slack
  `#w3c-rum-community-group`
  - (invites)
- public-rumcg@w3.org
  - (for discussions)
- RUM CG Github Repo
  - github.com/w3c-cg/rum
  - Group details
  - Links
  - Meeting minutes
- RUM CG Tracking Project
  - github.com/orgs/w3c-cg/projects/1
- Meeting Minutes via fireflies.ai
  - AI summary + transcript will be posted after
  - Full video recording also available

RUM RUM

- Nov 18 (before perf.now())
- https://www.eventbrite.com/e/w3-rum-community-group-real-user-meeting-google-amsterdam-tickets-1991177652961?aff=erelpanelorg
- Agenda
  - The state of the web going into 2027: ABC
  - Browser updates - Chrome (Barry)
  - Browser updates - Firefox (?)
  - Browser updates - Safari (?)
  - BFCache (Gilberto)
  - BEACON

Next Meeting

- Wed **December 9th** @ 10am EST
  - **SKIPPING 2026-11-11** - RUMRUM @ perf.now
  - 2nd **Wednesday** of each month

- Topics?
  - ?

- Submit & Vote topics @ bit.ly/rumcg-agenda

Topics Backlog

- ~~Better tracking/visibility into vendor positions (March 14)~~
- ~~Top tracking issues (e.g. this lighthouse issue) (March 14)~~
- ~~Baseline Project~~
- ~~Funding browser work for features~~
- ~~Header adoption (TAO, Server-timing)~~
- ~~Browser vendor presentations~~
- ~~RUM Archive~~
- ~~Callstacks from input delays (Issac Gerges thread in #general)~~
- ~~Container Timing awareness~~
- ~~ServerTiming / trailers~~
- ~~Bot and bad actor detection (bad CWV bots)~~
- ~~AI browsers~~
- ~~Open Telemetry~~
- Outreach to other groups (i.e. 3rd Parties, CDNs)
- Ad Blockers & tracking protection
- Implementation best practices
  - When to fire the beacon/how to deliver
  - SPA support
- Making sure we don't step on each other's toes (i.e. clearing RT buffers, multiple vendors on a page, etc.)
- Open source
- Securing the beacon

Active Focus Areas					INTEROP
Container style queries	100%	100%	100%	100%	100%
CSS anchor positioning	100%	100%	100%	99.4%	99.4%
CSS attr()	100%	100%	100%	100%	100%
CSS contrast-color()	100%	100%	100%	100%	100%
CSS shape()	100%	100%	100%	100%	100%
CSS zoom	100%	100%	100%	100%	100%
Custom highlights	100%	100%	100%	99.0%	99.0%
Dialogs and popovers	100%	100%	100%	98.2%	98.2%
Fetch uploads and ranges	100%	100%	100%	100%	100%
IndexedDB	100%	100%	100%	100%	100%
JSPI for WASM	100%	100%	100%	100%	100%
Media pseudo-classes	100%	100%	100%	100%	100%
Navigation API	100%	98.6%	95.8%	99.7%	94.4%
Scoped custom element registries	100%	100%	99.1%	99.7%	98.9%
Scroll-driven animations	99.9%	99.8%	100%	100%	99.8%
Scroll snap	100%	100%	100%	97.4%	97.4%
View transitions	100%	99.4%	79.8%	100%	79.3%
Web compat	100%	100%	100%	100%	100%
WebRTC	94.7%	94.7%	95.4%	98.7%	88.9%
WebTransport	99.4%	99.3%	92.3%	98.2%	90.6%
TOTAL	99.7%	99.5%	98.1%	99.5%	97.2%

Descriptions of all focus areas

Active Investigations	Group Progress
Accessibility testing	57.5%
JPEG XL	78.3%
Mobile testing	0.0%
WebVTT	0.0%
TOTAL	34.0%

Interop 2027

Scope

The Interop Project is a collaboration between organizations that implement web technology in browser engines. It defines a metric based on a set of web technologies that we collectively believe to be important to improve interoperability. This metric publicly keeps track of that work by using automated tests to score how much progress each participating browser has made reaching the shared goals.

There are many fantastic ideas for what the web could become. But the Interop Project is not the place to begin making those dreams a reality. This is a place to focus on interoperable implementations of ideas that have already been defined in detail in web standards. And it's a place to focus on interoperability through the use of automated tests to evaluate whether or not a particular browser matches what the web standard says it should be doing. In order for this to be possible, the Interop Project only focuses on specific kinds of web technology.

Everything chosen for the next year's project must be defined in a sufficiently mature standards-track web specification. If there is no web standard, then there is no definition of what a particular technology "should" be doing. The Interop Project is not an organization for defining web standards. That work is important, and must happen in the appropriate bodies, not here.

Everything chosen for the next year's project must be testable using automated tests on existing testing platforms. A proposal cannot be accepted if there are no automated tests to evaluate conformance to the web standard; if it's not possible to test the technology being proposed; or if the tests would need to run in environments that are not yet available on the infrastructure for Web Platform Tests (for example, in 2022 and 2023, testing on mobile operating systems was not possible).

If there is a particular blocker making it hard to test a certain feature, that could make for a good Investigation Project proposal. And ideas about how the WPT/Interop Project testing infrastructure can be improved for the future can be proposed as Investigation Projects, to be considered as work for the Interop Project to take on in the next year.

Interop 2027

Timeline

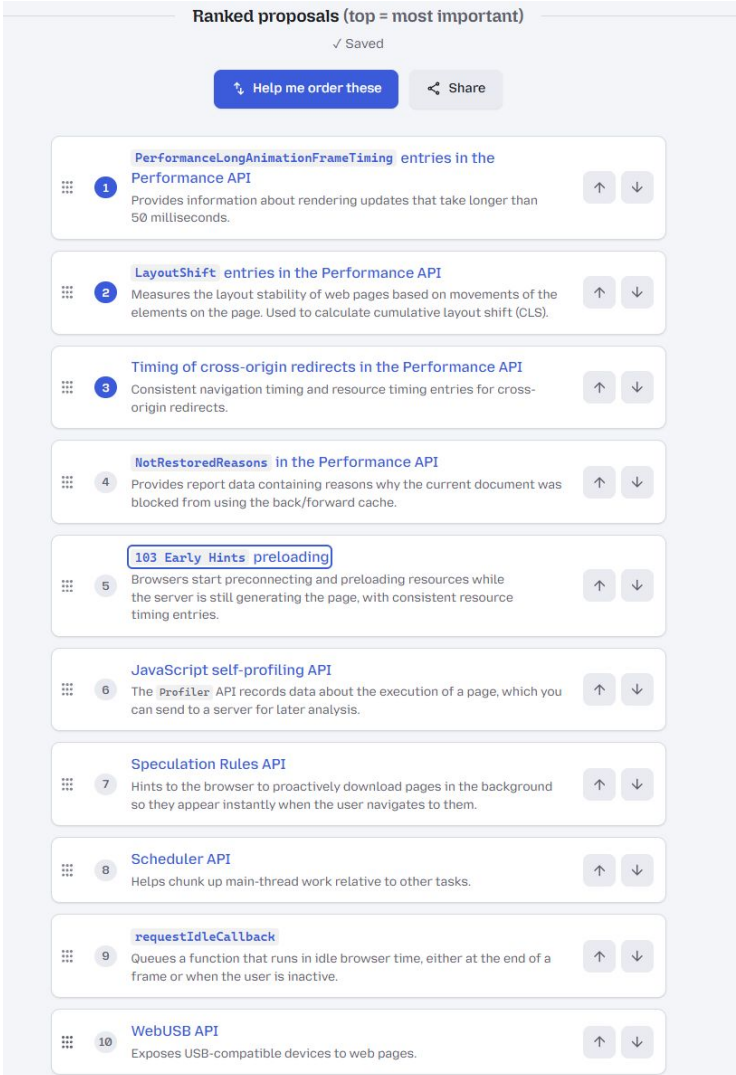

Interop 2027 proposal submission window ended on September 23rd, 2026. The overall timeline is as below. Please note that the timelines are subject to change.

- Proposal submission window (~3 weeks): Sept 3rd, 2026 through Sept 23rd, 2026
- Proposal selection: **Before December 17th 2026**
- Scope of the Interop 2027 project published: the first half of February, 2027

https://github.com/web-platform-tests/interop/blob/main/2027/selection-process.md

Ranking

https://interop-rank.fxdx.dev/

RUM / WebPerf Related

- Layout Instability API (CLS)
- Long Animation Frames (LoAF)
- Cross-origin redirect and Navigation Timing / Resource Timing
- NotRestoredReasons API
- 103 Preload and Resource Timing
- JavaScript profiler API
- scheduler.yield
- Speculation Rules

Monday - October 26

Location: TBD

Timeslot (GMT)	Dur	Subject	Links	POC
9:00	30m	Intros, Rules, etc		Yoav/Nic
9:30	30m	Speculation Rules - Website Provided Anonymizing Proxy		Bas
10:00	30m	Declarative Performance Observer		Shunya
10:30	30m	Break		
11:00	45m	Resource Start entries		Matt
11:45	45m	Container Timing		Jase
12:30	75m	Lunch		
13:45	25m	Download and memory as missing CWVs		NoamR
14:10	25m	Measuring non-interoperable times (e.g. style internals)		NoamR
14:35	25m	Interop x WebPerf		Michal
15:00	30m	Break		
15:30	30m	Stack traces from long tasks (and shorter long tasks)	Explainer	Fergal
16:00	45m	Paint Timing updates		Michal/Scott

Thursday - October 29

Location: TBD

Timeslot (GMT)	Dur	Subject	Links	POC
9:00	30m	Paint/Event Timing & Shadow DOM		Michal
9:30	30m	Prefetch activation beacon		Jiacheng
10:00	30m	Monitoring working vs idle	Explainer	Fergal
10:30	30m	Break		
11:00	30m	Cross-origin redirect measurements		Yoav
11:30	30m	Navigation Timing #160		Yoav
12:00	30m	Scroll Timing API		NoamH
12:30	75m	Lunch		
13:45	25m	Single resource, multiple fetches		Yoav
14:10	25m	Speculative load measurement		Yoav
14:35	25m			
15:00	30m	Break		
15:30	45m	Lighting topics??		
16:15	30m	Extending Long Animation Frames to Detect Congested Moments in Documents and Workers		Joone
